Premium Non-GMO Feeds with Natural Additives.

Made by the Ernst Family at Ernst Grain & Livestock.

- **Non-GMO:** All of our feeds are made with Non-GMO grains on our family’s farm in Western Maryland. We grow a majority of the grains in our feed. We know and trust the other farmer’s who grow grain for us. We test the grain to ensure it is GMO free. We believe in a open supply chain.
- **Local Sustainable Grains:** On our farm we utilize sustainable practices like no-till cropping, crop rotations, cover crops, and riparian buffers. We don’t just want to make premium feeds, but we want to protect our land and the environment while doing so.
- **No Byproducts:** Unlike many Non-GMO and Organic feeds, there are NO byproducts in our blends. You will be able to recognize the grains when looking at our mix. The ingredients are simple; the feeds are nutrient dense.
- **Natural Supplements:** Whole Grains, Essential Oils, Herbs, Diatomaceous Earth, Kelp, Linseed/Flax Oil, Minerals, Probiotics. A healthy feed means a healthy animal.
- **Omega 3’s:** Our feeds are enriched with Omega 3 fatty acids through flax resulting in eggs, meats, and milk with higher omega 3 levels.
- **Premium Feed:** Homestead Harvest Feeds are formulated for the optimum health of your animals . We do not take any shortcuts. We can honestly say our feeds are the best feeds we know how to make.
